INDEX.

A.

Apology, Editorial, 1
Agricultural Convention, 1, 39
Agriculture, 12
" Professorship on, 6
" Application of to Chemistry, 5
" in Ohio, 97; British, 131; of Dutchess County, 137; of Rhode Island 193; Use of Lime in, 384
Agricultural Fair, 9, 26
" Society, 9, 26; State Society 65; of New-York, 84; Poceedings of the Worcester County, 333
Agricultural School, 27
" Banks, 97
" Papers, 185
" Knowledge, Diffusion of, 239
" Education, 242
" Jurisprudence, 342
" Establishment at Moeglin, Prussia, 364
Apple, Pomace 16; for Stock, 137
Asparagus, 28; Directions for Cooking, 29; Spring Dressing, 29
Acids in Commerce, 59; Muriatic, 61; Nitric, 61; Arsenic in English Sulphuric, 220
Alkalies of Commerce, 62
Ashes, Pot and Pearl, 62
Ammonia, Sal 63; Process of making in Egypt, 14
Address to the Essex, Mass., Agricultural Society, 80; to the New-York State Agricultural Society, by J. B. Yates, 84
Address of Dr. J. F. Jarvis, President of the Hartford Society of Natural History, 345
Address of Mr. Reynolds, at Washington, on the South Sea Expedition, 377
Acclimation of Plants, 92
Attention to Stock, 94
Ants, to get rid of, red 104
Ambler's Mowing Machine, 115
Arts of Design in England, 140
Arts and Manufactures, Report of the Committee of the House of Commons, 150
Acacia Wood, Durability of 173
Aurora Borealis, 173
Aerostation, 180
Arches, Brunel's mode of constructing without centering, 22
Arrow Root of Florida, 237, 321
Argilaceous Soils, on the Nature, Formation, Properties and Productions of, by M. Puvis, 260
Analysis of Magnesian Soils, by M. Puvis 268
American Researches, interest of, to Europeans, 348
American Manufactures, 348
American Institute, and Fair of the, 354
Association, British Scientific 369
Aeronautic Observations, 378
Avery's Rotary Engine, 378

B.

Brazillian Plant, on the, 6
B. P., Letters of, 8, 166
Burning Lime, 26
Beans, Early 29
Beet, 29; Root Sugar, 124, 144; Seed. 206; Sugar, 219, 225; in Russia, 325, 338
Bees, on the Cultivation of, 31
" Hives for, 31
Bridges and Common Roads in New-York, Report on, 49
Botanic Garden, Prince's 68
Botts in Horses, a remedy for, 93, 119
Beef, Receipt for curing, 96
Banks, Agricultural, 97
Banking and Paper Currency, 97
Bement's Turnip Drill, 102
Bread, Corn and Snow 123
Bleaching, 127
" of Coton Yarn, by Chloride of Soda, 127
Bleaching of Silk, 129
" Wool, 128
British Agriculture, 131; Scientific Association, 372
Bronze, Analysis of two Varieties, 173
Butter, 204; Making, 246
Bannyan tree, 209
Barometer, height of, near top of Chimborazo, 220
Book Binders tools, new mode of heating, 286
Bull, Ossian, 289
Blind, printing for the, 302
Busts, 303
Berks County Silk, 328
Bone manure, 329
Baloon, the stupendous, 374

C.

Convention, Agricultural, by H. C., 1, 26, 27, 39; Railroad, 286
Cutting and preparing food for cattle, by H. C., 2
Cotinus, Rhus, by W. P., 6
Carrots, yel of 16, 29
Cocoonry, 21; Cocoons and Raw Silk, 342
Cabbage, 29, 376
Cauliflower, 29; How to Cook, 29
Celery, 30
Corn, 30; Premium, 32; Mill, S. P., 96; Culture of, 106; Planter, Robins', 128, Rolls, 123; Corn, 139; Large Crops, 149; without tillage, 177; Crops, 328
Cucumber, 30; Cultivation and forcing of, 70; their growth and progress, from January to September, 70
Cancer, cure for 32
Canada Thistle, 33; Destruction of, 119
Clay, Henry's fine cattle, 36
Cinnamon fields in Ceylon, 49
Common Roads and Bridges in the State of New-York, 49
Chemistry, its Application to Agriculture. 58
Chemistry, its Application to the useful Arts, 59, 125, 180, 309, 380
Chemistry, utility of its Application to Agriculture and Horticulture, 112
Cattle, Short-horned Durham, sale of, 93, 129; Selection and Breeding of, 129; Fattening of, 129; Great Sale of, 131
Cure for Botts in Horses, 93
Cows, fat 96; Breeding of milch, 115; Mode of breaking vicious, 233; Yard frolics, 235
Culture of Potatoes, 106; of Wheat, 148; of the Plum, 171; of Wheat, 230; of Turnips, 231; Roots, &c., 236; of Tea, 362
Croup, remedy for, 117
Clover Seed, Sowing of, 117; Leaves, 248; with Oats, 376
Cotton, East India and American, 123; Seed, Machine for hulling, 213; Manufacture, 324; Chronology of, 328
Chloride of Lime, Manufacture of, 125
" " Soda, Preparation of 126
Chimneys, Moveable Hood, for Smokey, 142
Cashmere Goats, 161
Calves, mode of weaning and rearing, 166
Crops, State of, 168; Prospects of, 217
Cement, Marble 178; Hydraulic, 382; Roman, 383
Charcoal, Manufacture of, 182; Improved mode of preparing, 183; Animal, 311; do. to discharge Vegetable Colors, 311
Cottage Gardening, hints for improving, 190
Cab, a new safety, 191
Chaptals Chemistry, 201
Carding Machines, Improved, 214
Capilary tubes in Metal, 213
Canals, Ship, 224
Chickens, Raising, 238
Cream, Mode of keeping, 245; to keep for Churning, 245
Chinese Manufactures, 260, 303
Cabbage, Early York, 273; Waterloo Cesarean, 322
Carnation, Pink, 229
Coke, Manufacture of, 309
Cactus and Cereus, on the Cultivation of several Varieties, 318
Creation, on the order of, 319
Canker and other diseases in fruit trees, 326
Coal near Newburgh, 328; in Cuba, near Havannah, 351
Compost manure, 333
Cold, produced by Sulphate of Soda and Muriatic acid, Rational, of, 326; effects of, 376
Carriage Speed Regulator, 368
Colors, Porcelain, 368

D.

Dyers Establishment, Silk, 21
Dahlias, Observations on, 57; Exhibition of, 367
Dry Rot, Preservation against, 116; Remarks on, 172

Dutchess County, Agriculture of, 137
Durham Cow, produce of, 161
Dairy, Harleian, 161, 163, 195; Dairying, 245; Profits of, 249
Depredators, by observer 246
Dying, Researches in the art of, 259
Discovery, interesting, 303; Important, 351; Curious, 368
Durability of Wood, 334
Dawson, William, Memoir of, 361

E.

Experiments in Farming, 31
Edge tools at Rochester, 32
Essex Agricultural Society, Report on Farms, 72; Address, 80
Egypt, Climate and air of, 100
Electrical Shock, from a sheet of paper, 178
Expense Tables, 215
Education, Agricultural, 242
Early Peas and Cabbage, 273
Eclipse of May 15th, 1835, mode of reducing observations upon, 349
Eclipse of May 15th, 1835, account of, 350
England and America, Intercourse between, 368
Engine, Avery's Rotary, 379

F.

Feed for Cattle, on cutting and preparing, 2
Farmers, Important to, 7; To, 59; Work for Spring, 98; Products of Samuel T. Varys, 101; Can double the Value of the State, 137, Work, 172; may be, 180; Work, 205; Farmer's and Gardener's Work, 237, 241
Fair, Agricultural 9; of the American Institute, 354
Farming Experiments, 31; Great products in, 31, 49; Successful, 65
France, use of manures in, 47
Fruits and Flowers, 74
Farm Buildings, 89
Fodder, consumption of, 89; Amount which can be raised on an acre, 232
Fruit trees, Transpanting, 94; for seed, Van Mons' Theory, 201, 294; Fruit, causes of Diseases, 326; On the treatment of old, 327
Fat Cows, 96
Flax, Specimen of Bleached, 260
Flax Spinning, 96; Seed, method of growing in fallow ground, 108
Father in New-York to his son in Pa., 107
Fly, Hessian, 109
Fire Wood, seasoned, 119
Foot Rot in Sheep, cure for the, 136
Female Industry applied to Silk Culture, 205
Fire Ladders, Improved Portable, 215
" Engines, T. A. Chandler's Improved 224
Farmer, and Earl Fitzwilliam, 235
Facts and Observations, 325
Fossil Bear, 376

G.

Glass, Manufacture of Soluble, 10
Garden, Kitchen Management of, 28
Geological Survey of the State of New York, 80, 240
Grease spots, to remove, 96
Gass, Extraordinary Application of, 112. Expansion of, 220; Gass light, 311 Manufacture of, 314; do. from Rosin, 316; Comparative value of, 316
Grafting, Hints on, 118
Goats, Cashmere, 162
Garget in Cows, Cure for, 211
Grain, 240
Gothic Pendant, on the Mathematical form. of, 286
Gypsum, Remarks on the supposed Discovery of, in New York, 298
Green Sand and Calcareous Marl, 300
Geology, 346

H.

Horses, Management of, 110
Harrow, Revolving Press, 7; Woodsides, 34
Hunter's Stone Planing Machine, 13
Honey, to the Lovers of, 30; Manufacture of, 101
Hive for Bees, 31
Healthiness given to the Soil and Country by Calcareous Agents. 46
Horse Power for Grist Mills, 48
Heat and Light, influence on Vegetation, 58; Buildings, new mode of Heating, 179; the Elephant House, 221; degree of, to raise cream, 245; Discourses on Central, 292
Horse Rake, Pudney's Revolving, 68; Hoe, 256
Horses, cure for Botts in, 93
Hessian Fly, 109, 323
Hints on Grafting, 118
Hot Air for Heating Rooms, 119
Hay, to estimate weight of, 124; Making, 165
Hoe, Weeding, 161
Hogs, raising of, 217
Horticultural Society of Massachusetts, 250; of London, 367
Horticulture, 273, 364
Heifer, Precocious, 323
Hams, how to Cure, 362
Hydraulic Cement, 382

I.

Important to Farmers, 7
Inquiries 35
Improvements, Necessity the Mother of Invention, 102; in Models, 281; Indian, 348
Indian Corn, 106; to Preserve, 107
Ice Trade with India, 208
Improved Stock, sale of, 210, 237
Information Wanted by a Young Farmer, 233
Institute, Fair of the American, 354
Intelligence, Foreign, 372

J.

Journal of the American Institute, 193

K.

Kitchen Gardening, 28

L.

Lime as a manure, 1, 22; by Puvis, 43; its ancient use, 23; various modes of applying &c., 24; in different countries burning of, 26; manner of treating lime land, 44; absorption of, by plants, 44 amount taken up by plants, 46; in manure, virtues of, 135; use of, in agriculture, 384
Letter of B. P., 8; from a Father in New York, to his son, in Pennsylvania, 107
Lettuce, 30
Laboring classes in Europe, 32
Light and heat, influence of, on vegetation, 58; absorption of, by nitrous acid gas, 336
Lectures, course of, by Professor Renwick, 59
Lemons, 65; tree, 98
Lowell, Massachusetts, 102, 104
Little Falls, 169
Locust, yellow, 111; who will not plant, 185
Locomotives and rail way carriages, improvements in, 214
London's Gardeners' Magazine, 227
Lands reclaimed from waste, 279; in Virginia, by a London auctioneer, 326
Liberality of a railroad company, 280
Laplace, Count, 303
Lamp black, 310
Lever lock and key, report on, 336
Linæus, Buffon, and Daubenton, 345

M.

Manures, importance of those which improve the constitution of the soil, 22; various kinds, 23; result of the use of, in France, 47; Putnam's mode of making, 73; mineral, 307; bone, 329; mineral, 337; different effects of, before and after liming, 350
Manure, lime as, 1, 22, 43
Management of pumps in cold weather, 8
Mulberry of various kinds, 17; to propagate by cuttings, 19, 327
Mangel Wurtzell, 29, 139
Melon, 30
Mince pies at any time, 32
Merino sheep, 37
Memorial to the legislature, 43
Mills, horse power for, 48
Muriatic acid, 61
Mowing machine, 66; Ambler's, 115
Mule, Dissertation on, 78
Machine, Thrashing of, John Shaw, 66
Maxims, 117
Mechanics' Institute, proceedings of, 141
Milch Cows, importance of Spaying, 146
Manufactures and the Arts, Report to the House of Commons, 150; a new, 328, American, 348
Metals, effects of Drawing, Rolling, and Annealing, 172
Marble Cement, 178
Mines and Quarries, mode of lighting, 191
Marl for Manure, 209, durability of the effects of, 308, application 337, analysis of, 337
Malleable Iron Foundry at Philadelphia, 221
Meteorological Tables, 224, 288, 352, Society, 368
Matters of Interest to all, 226
Milk, proper time for Skiming, 245
Magnesian Soils, analysis of by M. Puvis, 268
Models, 281
Mineral Wealth of the Country, 286
Memorandum Books, Fragments from, 289
Metallic Light Houses, 378
Mortar, Preservation and Use of, 381

N.

New-York Agricultural Society, 84, Address by John B. Yates, Esq., 84
Notices of the Season, 193
Nutmegs, History of, 279
Novelty, Steamboat, 286
Native Plants, 289

O.

Of Liming, 23
Olive, 92
Ohio Agriculture, 99
Oat and Wheat culture, 110
Oats, Scotch, 119
Olmstead's Stoves, 271
Orange, Osage, 289, use for Silk worms, 317
Ox reform, or a new mode of hampering unruly Cattle, 302
Ornaments, Berlin Iron 303
Otaphone, or instrument to aid in Hearing, 335

P.

Preparing food for Cattle, 2
Professorship of Agriculture, 6
Plant, Brazilian on, 6
Press Harrow, Revolving, 7
Pumps, management of in cold weather, 8
Planing Machine, for Stone, 13
Plants, Sap of, 16; absorption of, on cultivated soils, 45; acclimation of, 92; Biennial and Perenial, 138; of the United States, 169; method of preserving on a long voyage, 232; acclimation of, 316
Pomace of Apples. 16
Products of the Domain of La Croisette, Mezeriat, and La Baronne, 25
Produce, Large, 31
Premium Corn, 32
Pie, Mince, how to have at any time, 32
Power, Horse for Mills, 48
Pot and Pearl Ashes, 62
Prince's Botanic Garden, 68
Putnam's Report of his success in Farming, 72, 74
Potatoes, culture of 106, 140; Squash, 185, 201; Early mode of obtaining in France, 206, 211; Preserving, and Raising from Seeds, 276; Preserving and Raising from Seed, 277
Pasture grounds, management of, 116
Plaster, beds of, in the West, 138; curious facts, 203
Painting, to imitate various kinds of wood, 140
Pumpkins, a new kind of, 150
Pea Sticks, new fashioned, 155; early, 273
Patent Law, Bill reported, 158; office, those who have business at the, 281; application for, 281; appeals, 282; information in General, 282.
Plum culture, remarks on the insects infecting that tree, 271; grafting on peach stocks, 202
Pride of India Tree, for Fencing, 190
Pork, 203; Raising, 244
Printing Ink, Improved mode of making, 216; Rotary Machine, 302
Paper Mills at Northampton, 221
Peach trees cultivated in pots, 235; method of destroying worms on, 257; process for restoring, 353
Planting, No. 1., 239; do. No. 2., 239; in Scotland, mode of, 277
Puvis, on the nature of Argilaceous Soils, 260
Ploughing by Steam, 279
Peabody tree, remarks on, 291
Paris, Improvements in, 303
Peat, 349
Puzzolanni, 383
Ploughing, 279

Q.

Quarries. 37
Questions respecting Water-wheels, Heating and Ventilating dwellings, 178
Quick Lime, preparation of, 389

R.

Rhus Cotinus, on, 6
Rush's Report to Congress, 19
Roads, Common, we want better, 27; an Railways influence of, 95; in England, 12
Rochester Edge Tools, 32
Revolving Harrow, Woodsides, 34
Report on Roads and Bridges in the State of New-York, 49; Quarterly Agricultural 277; on the Patent Laws, 304; Agricultural for 1835, 56; Eseex Agricultural, 65; on Farms by the Essex Agricultural Society, 72; of the corresponding Secretary of the New-York State Agricultural Society, 117; of the Committee of Congress on the Patent Laws, 155; Rural Scenery, 167; of Water Commissioners, 247
Railroads, cheap, 64; Agricultural, 66; Syracuse and Binghampton, 169; to overcome elevations on, 189, 216; Cleaveland and Ohio, 223; Railroad great Seuthern, 224; Canajoharrie, 248; convention, 286; mode of rendering the wood indestructible, 287; in India, 303.
Rake, Pudney's Revolving Horse, 68
Ruta Baga, Culture of, 92; compared with Potatoes, 178
Rolls, Corn, 123
Roots for Cattle, 172; culture of, 236
Raising Vessels, Machine for, 213
Rhubarb, large stalk, 241
Rivers, Phenomena of, 301
Republican Institutions, influence of, 347
Rat Stopper, 367
Rotary Engine, Avery's. 379
Roman Cement, 383

S.

State Agricultural Society, 9, 65, 84
Soluble Glass, Manufacture of, 10
Stone Planing Machine, Hunter's, 13
Sap of Plants, 16
Silk Worm, No. 7, 17
Silk Worms, Space necessary for, 21; Improved Mode of Raising, 212; Osage Orange, Food for, 317
Soil, Mode of Improving by Lime, 22; Suitable for, 23; on the Nature and Properties, by M. Puvis, 260, 268
Silk qualities, 76, 77, 78, 99; Bleaching, 127; Disbanding from the reel, 76; Preparations and growing establishment, estimates for, 74; Manufacture of first hdkfs., 193; Culture, 200; Business, 296; Culture, 327; in Berks County, 328; Raisers, to, 334; Business, 341; Silsify. 352; Cotton goods, 355
School, Agricultural 27
Sheep Husbandry, 37, 48, 93
Sheep, Saxon, 37; South Downs, 37; Policerate, 67; high price of, 90; Worms in the head of, 108, 139; Merino, 136; cure for the foot rot, 136; importance of housing, 147; relative value of Merino and Saxons, 257; Breeders, 289; Saxons and Merinos, 321; on two legs, 321; Saxons and Merinos, 353
Sulphur and nitre, 60
Soda, manufacture of, 63
Successful farming, by C. N. Bement, 65
Strawberries, new varieties, 69; Various kinds, 69, 167, 175
Sugar cane, 92; crop, 93; from corn, 124; manufacture of from Beets, 124
Sugar Pan of Dr, Ure, 143; Beet seed, 266; manufacture of, 212; Beet, 219
Stock, attention to 94; sale of improved, 210; difficulties of importing, 210; improved, 237
Social influence of roads and railways, 95
Steam *vs.* Water, 96, 175; conveyance between Paddington and London, 228;
Season, by H. C., 98; notices of, 193
Sowing clover seed, 117
Seasoned fire wood, 119
Scotch Oats, 119
Smut in wheat, to prevent, 144
Spaying milch cows, importance of, 149
Soap from flints, 155
Ship sheathing with bronze, 173; Canals, 224
